

Dear Sir/Madam,

My name is Henry Akachukwu Agu from Nigeria. I write to express my interest in the Stipendium Hungaricum Scholarship Programme to study Medicine at a Hungarian University as it has always been my life long ambition to become a medical doctor.

My undying interest in the medical sciences was developed at a young age and I haven't stopped learning, researching medical related topics since then.

My early passion for medicine, coupled with my love for helping people, and my determination makes me a good candidate for the scholarship. I would love to acquire my knowledge in the medical field from the brightest lecturers in Hungarian Universities.

This scholarship will enable me access the required knowledge and skills needed to achieve my goals of helping people in my country. I want to build an excellent career in the field of medicine that will benefit my country.

I hope to be given a chance and I look forward to hearing from you.

Yours Faithfully,

[Your Fullname]
