Dear Selection Committee,

My name is [Your Fullname], I recently; completed the undergraduate program in information technology, and now I want to show my interest in being part of this university in 2024 on a scholarship basis.

It would be an excellent opportunity for me; to pursue my master's degree from this university, as it would give me the opportunity to strengthen my knowledge and polish my technical skills. Along with this, I will get the chance to meet and get guidance from the highly educated staff of this university.

Computer Science is more like a passion for me other than just a career. I have been working in a Software House as a Web Developer; for the past two years. And I yearn to continue growing and become an expert in Artificial Intelligence.

I am proactive with my ability in technical analysis, as it always intrigues me with curiosity. From the early years of my study, I have always been a very bright student, completing my whole studies until graduation on full scholarship. My shining academic record shows my intellectual and cognitive intelligence.

The curriculum of my undergraduate program gave me the opportunity to study computer science more deeply; and get to know a wide variety of computer science subjects like Data Structures and Algorithms, Computer Communications and Networks.

By availing the scholarship opportunity from this university, I will be able to get global exposure in the Technology sector: After the completion of my master's in computer science, I am looking forward to working for the betterment of my country's technology sector.

I want to work in empowering my country's technology sector: so I would like to apply for this scholarship opportunity from this university. It will be a good count for my future career.

Thank you for your time in advance.

Yours sincerely,

[Your Name]
